

From the publisher of *Somerset Studio*®

creating today • preserving tomorrow

GreenCraft

magazine

Green is the new black ...
being green, that is.

Finding creative uses for old items is nothing new to artists, but the spirit of preserving the planet is more important than ever before and *GreenCraft Magazine* is here to honor and inspire those who find artistic applications for normally discarded resources.

GreenCraft Magazine will provide ideas for repurposing trash to treasure by showcasing projects where waste is repurposed into ecologically chic creations.

So ... have you found a use for cardboard rolls left over from paper towels? Have you cut up an old T-shirt and knitted it into a purse? Have you taken a burned-out light bulb and made it into a beautiful flower vase? Have you transformed old board games into notebooks? Then we want to hear from you!

To be considered for our Publication, please submit your recycled, reused and repurposed items to *GreenCraft Magazine* no later than April 14, 2009 to:
